

UXV TECHNOLOGIES

Background

- Founded in 2014 started with focus on commercial technology products
- UXV Technologies is located in Ishøj, Denmark
- 100% Bootstrapped company, based on organic growth, owned by the partners
- Employ around 50 people
- Today 100% of sales is export, 90% is for the US, with high level of DOD end-use
- Almost double growth in headcount and turnover last 3 years
- In 2021 we acquired our own head office (big thing for a small SME)

What do we do?

We develop and produce custom:

- Ground control stations / HMI / GCS / WMI
- Sensors and Gimbals (Driving, Sailing and flying robots)
- Power electronics for motor and motion control
- Communication and interface systems
- Safety systems for weapons in the loop control
- Composite mast systems

Our vision

- Inspired by the Automotive industry
- Focus on what you do best
- Defence Robotics (2020-2030)
- Add value to the supply chain
- Expand into existing supply chain
- Work with the integrator not the end-user
- Don't sh*t where you eat

Use cases

Noteworthy UXV Technologies customers
