

CenSec

CENTER FOR DEFENCE, SPACE & SECURITY

CenSec Member Brochure 2025

Co-funded by
the European Union

Danish Board of
Business Development

CenSec - Center for Defence, Space & Security - is the national Danish cluster organisation for stakeholders within the defence, space and security industries.

CenSec has 200 members consisting of Danish and international SMEs, larger enterprises, knowledge institutions and research and technology organisations.

CenSec's members collaborate, innovate, and deliver products, services, and knowledge to the value chains of the defence, space and security sectors.

As a member of CenSec, you will be part of a strong, growing network. Through an international eco-system, CenSec supports our members in expanding their business, including expanding market knowledge, competencies and education, as well as innovation and growth.

Additionally, CenSec works with prime contractors, system integrators, Ministry of Defense procurement, logistic and repair agencies etc. to identify, develop and recommend appropriate supplier and sub-contractor capability.

In October 2020, CenSec was appointed by the Danish Ministry of Higher Education and Science and the Danish Board of Business Development to be the national Danish cluster for defence, space and security in the 4-year period from 2021-2024.

CenSec is a member of Cluster Excellence Denmark and certified as a Gold Cluster by the European Cluster Excellence Initiative.

Member competencies

The CenSec members are a group of professional and specialised companies, knowledge institutions and research organisations. Our members offer products, knowledge and services of high quality and together they cover a wide range of competencies.

Scan the QR code to see CenSec website and online member brochure.

CenSec secretariat consists of dedicated employees who have a broad educational background and experience from both the military and the civilian sectors. We are based with our head quarter in Viborg, and three hubs across the country; in Copenhagen, Aarhus and Vojens.

Each of the three domains defence, space and security are represented in the secretariat with domain managers. Each of them is responsible for developing the domains according to our strategy and action plans, including the activities, events and networks within each domain.

Our funding manager handles the applications for national and European projects and is responsible for taking home funds.

The project office oversees our national and international projects. Currently, we have 11 projects in our portfolio; five European projects, where CenSec is part of the international consortium with each partner responsible a dedicated work package, and six national projects, including NCC, National Coordination Centre for Cybersecurity, and INTLOOP, matchmaking and consortium building for knowledge institutions and SMEs to apply for EU funding programs.

CenSec Startup Incubator includes several Danish startups within the defence, space and security sectors, which we guide and help towards business development, collaboration opportunities and market access.

Lastly, we also handle all communication tasks across all events and communication platforms and provide member services as weekly activity overview and biweekly newsletters.

Hi-con

Hi-Con's story began at Aalborg Portland in 1986 when engineers developed a new type of concrete – Compact Reinforced Composite (CRC). This innovative material comprised a complex mix of binders and steel fibers, resulting in concrete with exceptional strength, durability, and low porosity. CRC's distinctive properties, such as high density, allowed for thinner cover layers and reduced material usage compared to traditional concrete.

Wiley X

Wiley X was established in 1987 with a determination to create the world's best protective gear. As pioneers in protective eyewear, we believe there's a singular way to make gear for the world's harshest environments. Decades of innovation and design refinement have taught us that you never cut corners and you don't let up. That's the only way to ensure our products continue to inspire confidence.

ZAFEHOUE

Our solution 'ZafePass' is the swiss-army knife of access to any IT/OT/IoT resource, service, application and/or data created with a security focus. A multi-purpose solution external adversaries cannot compromise from a technology perspective, using default-deny, null-state and advanced obfuscating techniques, ZafePass allows only explicit access and is immune to hacking tactics, techniques and procedures. A ZafePass license owner will have full control over users and how applications/services/data are consumed.
